RS PRO 1m Stainless Steel Bar 20mm

RS Stock No:

FEATURES

- **High Tensile Strength:**Ensures durability and reliability in high-stress applications with a tensile strength of 515 MPa.
- **Thermal Conductivity:**Efficient heat transfer with a thermal conductivity of 16.1 W/mK, ideal for heat exchangers and pressure vessels.
- **Corrosion Resistance:**Made from stainless steel, offering excellent resistance to corrosion in harsh environments.
- **Precision Dimensions:**1 metre length and 20 mm width for precise engineering requirements.
- **Compliance:**Meets BSI, ISO 9001, and UKAS standards for quality assurance.

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The RS PRO Stainless Steel Bar is a robust and versatile solution for industrial applications requiring high tensile strength and excellent thermal conductivity. With a length of 1 metre and a width of 20 mm, this round bar is suitable for demanding environments such as jet aircraft and oil refineries.

General Specifications

Product Type	Stainless Steel Bar
Density	8.09 g/m^3
Form	Round
Suitability	Jet Aircraft;Oil Refinery Equipment;Stack Liner;Industrial Boiler;Pressure Vessel;Heat Exchanger

Mechanical Specifications

Length	1 m
Width	20 mm
Tensile Strength	515 MPa

Approvals

Standards/Approvals	BSI;ISO 9001;UKAS

Thermal Performance Specifications

Thermal Conductivity	16.1 W/mK
